

At the 2023 Greenon FFA Farm Day, all the FFA members help plan and execute Farm Day. Some students brought animals, some ran activity stations, and others served as group leaders taking the kids to different stations and animals. We had a few different animals at a farm day this year including dairy feeders, pigs, beef steers, goats, rabbits, different kinds of poultry, and even a donkey. The activities at Farm Day allowed our elementary students to have fun while learning about agriculture. Some of our activities included learning how to milk a cow, how to shear a sheep, and learning what types of animals are livestock. Throughout the the day grades preschool to 4th grade and even some of our local police officers got to come out and enjoy farm day.
